### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1616

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 5/3/2004 has been entered.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 3, 5-8, 10-16, 18 and 20-26 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2, 4, 6-9, 11-29, 93-113 and 121 of copending Application No. 10/131,511.

Art Unit: 1616

Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reasons.

The above noted claims in the copending application 10/131,511 are directed to a method of reducing inflammation of an inflammatory skin condition, wherein rosacea is specifically recited as one such skin condition. The same antimicrobial metal with "sufficient atomic disorder" is utilized. See in said copending application, claims 1 and 121, for example. In the present application, the claims are directed to method of treating "acne conditions." Under the facts of the present application, treating "acne conditions" would encompass treating rosacea. Rosacea is also known as "acne rosacea" and it is a type of acne condition. Therefore, the ordinary skilled artisan would have recognized rosacea as an obvious condition within the scope of the claimed "acne conditions."

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

In the interest of expediting prosecution, if applicant is aware of any other copending applications in which the elected, pending and/or examined subject matter is directed to a method of treating skin conditions that may encompass or read on "acne conditions," an early filing of terminal disclaimer over such applications is suggested.

Art Unit: 1616

References listed on the attached PTO-892 are cited to further show the state of the art. It is noted that the cited U.S. Patent Application Publication 2003/0054046 is the publication of the copending application 10/131,511, *supra*.
